

APA for Academic Writing (2017-2018)

The Purpose of Referencing/Documentation

- A. to identify (**cite**) other people’s ideas and information used **within your essay or term paper**, and
- B. to indicate the sources of these citations in the **References list** at the end of your paper.

APA Format

The APA format is only one of many methods of documentation. Details about the format are found in

- the *Publication Manual of the American Psychological Association* (6th ed.) (at MRU Bookstore and MRU Library)
- the [APA Style Guide for Electronic References \(6th ed.\)](#) (referred to in this handout as *Electronic Guide*)
- the APA website at <http://apastyle.apa.org/> (including Frequently Asked Questions [FAQ]) and the *APA Style Blog*

NOTE: The APA manual is not designed specifically for students. These guidelines have been adapted by MRU to fit the needs of MRU students. Please consult with your professors if you have any questions about referencing guidelines for specific courses.

Avoiding Plagiarism – Citation Principles for Essays and Term Papers [APA pp. 169–170]

Within essays, term papers, and any other written assignments (as in all academic work), you must identify (i.e., reference, document, cite) all quotations, paraphrases, ideas, and images from someone else’s work. You must name the original author or source and surround quoted material with quotation marks or set it in a block format as described in this handout (pp. 1-2). Copying any material and submitting it as your own (**plagiarism**) is an academic offence. Plagiarism may result in failure on the assignment and, in some cases, expulsion from MRU. For more information, see the [Guide to Avoiding Plagiarism](#) and the section on “Plagiarism & Cheating” on p. 14 of the MRU [Student Conduct Guide](#) at www.mtroyal.ca/codeofstudentconduct.

NOTE: Page numbers in square brackets refer to the *APA Publication Manual* and the *Electronic Guide*.

Referencing/Citing Sources within Your Paper

Whenever you use a quotation from an author or summarize or paraphrase a person’s ideas or research, you must identify (reference/cite) the source. This **in-text citation** is formatted with **parentheses** and shows

- the last name of the **author(s)** of the work, unless already stated [APA p. 174]
- **or** the first few words of the References list entry (usually the title) if the author is not known [APA p. 176]
- the **year** of publication **or** n.d. (no date) if the year is not known [APA p. 185]
- **page number(s)** if available (if not available, refer to p. 2 of this handout) [APA pp. 170–172]

Citing Short Quotations (fewer than 40 words) [APA pp. 92, 170–172]

When you incorporate a direct quotation into a sentence, you must cite its source.

<p>Author’s name in your text</p> <p style="text-align: center;">OR</p> <p>Author’s name in parentheses ()</p>	<p>Lee (2007) stated, “The ability to think critically is needed in this revolutionary age of technological change” (p. 82).</p> <p>One researcher emphasized that “the ability to think critically is needed in this revolutionary age of technological change” (Lee, 2007, p. 82).</p>
--	--

NOTE: You must blend (incorporate) quotations into your own sentences. Begin with your own words or start with the author/date and follow with the quoted material (see examples above). When using the author said/stated format without the word ‘that,’ start the quotation with a capital letter.

Citing Long Quotations (40 or more words)

[APA pp. 92, 170–172]

- Use a **block format** in which all lines of the quotation are indented approximately ½ inch from the margin.
- **Do not use** quotation marks.
- Introduce the quotation with a complete sentence and a colon.

Wang, Johnston, Juarez, and Marks (2010) described effective time management as an ongoing process:

Time management is not a skill that can be achieved at once; it takes self-awareness, planning, execution, and reflection. The perception about time management is that the work is done once a schedule is created. In reality, that is only the first step. Successful students are adaptable and flexible; they are able to make changes to a schedule because they can purposefully and proactively move tasks around to adjust to new situations. (p. 27) *period *before* the parentheses for long quotations

Citing Summaries or Paraphrases

[APA pp. 171, 174]

When you put information in your own words by summarizing or paraphrasing, you must cite the original author and year. APA (2010) also recommends you include a page or paragraph number to “help an interested reader locate the relevant passage” (p. 171).

One researcher emphasized the necessity of flexibly applied thinking to cope with rapidly changing technology (Lee, 2007, p. 82).

OR Lee (2007) emphasized that flexibly applied thinking is vital to cope with rapidly changing technology (p. 82).

Citing Information If No Page Numbers Are Available

[APA pp. 171–172; FAQ]

Electronic sources such as websites commonly have no page numbers, so you cannot put a page number in the in-text citation. PDFs, however, normally show original page numbers.

- If the source has no page numbers but explicitly numbers the paragraphs, you can include the paragraph number (s), preceded by the abbreviation “para.” in the citation parentheses.
- If the document has no page or paragraph numbers but does have headings, use the heading (with capitals and no quotation marks) of the section you are taking information from and then give the number of the paragraph under it that contains the information you are incorporating in your essay. The example below includes the complete heading: Fostering Health Security.

According to the World Health Organization (2010), “one of the greatest threats to international health security arises from outbreaks of emerging and epidemic-prone diseases” (Fostering Health Security, para. 1).

- **If the heading is long**, shorten it, keep capital letters, and put quotation marks around it. The heading What is the Burden of Alzheimer’s Disease in the United States? has been shortened to “What is the Burden?” in the example below.

Centers for Disease Control and Prevention (2010) have pointed out that “Alzheimer’s disease is one of the top ten leading causes of death in the United States” (“What is the Burden?,” para. 1).

- If the source has no headings, count the paragraphs and include the paragraph number in parentheses, e.g., (para. 7). [FAQ]

Citing a Source Found/Cited in another Source

[APA p. 178]

Often an author writes about research that someone else has done, but you are unable to track down the original research report.

In the sample below, research done by Pithers is discussed in a journal article written by Lee, and you only read Lee. Include **only** Lee's article in your References list.

A 2000 review by Pithers found little empirical research on students' critical thinking (as cited in Lee, 2007, p. 83).

Citing References within Your Paper

In their examination of students’ acquisition of learning strategies, Simpson, Stahl, and Francis (2004) stressed that students will use a strategy if they understand how, why, and when to use it (p. 3). The researchers explained that learning this “procedural knowledge would help them understand the steps . . . and how to modify those steps” (p. 3). Simpson et al. argued that using the specific strategy taught in a course is often not as important as using the process the students learn of “selecting, summarizing, organizing, elaborating, monitoring, self-testing, reflecting and evaluating” when working on course content (p. 4). The researchers recommended that faculty teach students “how to decipher their own academic tasks” (p. 6). In addition, Lee (2007) argued that once students have acquired a repertoire of study strategies, they should be taught critical thinking skills to evaluate and modify their use of specific strategies (pp. 82–83). Acquisition of strategic learning is, as Hadwin et al. in 2001 explained, “enacted over time through a series of events” (as cited in Simpson et al., 2004, p. 3). P. Foley, a professor at North London University, observed that motivation is strongly linked to student use of learning strategies (personal communication, May 16, 2007). Motivation, in turn, can be influenced by students’ beliefs about learning. Simpson et al. (2004) commented on such beliefs:</p> <p style="padding-left: 40px;">[Many] college freshmen . . . believe that learning should be easy, completed quickly (i.e., the night before in a cramming session) and should happen to them because of what others do for them (i.e., the professor did not teach me to solve that problem). (p. 4)</p> <p>Flexible use of strategies, self-reflection, and motivation can enhance academic success. If there are</p>

*NOTE: When authors are named in your sentence, and you use the reference again in the same paragraph, list authors, date, and page number the first time. List only the page number for the subsequent citations if it is clear to the reader that you are still citing the same source. If you write the authors’ names again as part of the sentence, omit the date. This does not apply if the names are in parentheses at the end of the sentence. However, when you use that reference in a later paragraph, include again the authors (with et al. if applicable), date, and page number.

Integrating Research into Your Writing

<p>Citing a quotation used at the start of a sentence, and then continuing with your own words/ideas/ comments</p>	<p>He found that the “results demonstrated that the first variable (persistence) had the most effect on the outcome of an exam” (Twoyoungmen, 2010, p. 96), but the study lacked sufficient detail.</p> <p>OR</p> <p>Twoyoungmen (2010) found that the “results demonstrated that the first variable (persistence) had the most effect on the outcome of an exam” (p. 96), but the study lacked sufficient detail.</p>

Creating Your Reference List

(See the Sample References Page on page 6 of this handout.)

- Start the references list on a separate page at the end of your paper [APA p. 37]
- Include only those sources you have cited in your paper [APA p. 180]
- **Exceptions** are personal communications, classical religious works such as the Bible or the Qur'an, and classical works. These do not appear in the References list. [APA pp. 174, 178–179]
- **Double-space** the entire References list. Do not add an extra blank line after the title. [APA p. 180]
- Position the first line of each reference flush left, with subsequent lines wrapping with a ½-inch (hanging) indent. [APA p. 180]
- Organize the list in **alphabetical order** according to the first letter beginning each entry. Usually, the author's last name is the first piece of information in each entry. Use initials for the author's first/middle names. [APA pp. 181–183]

Explanation of References Listings: Pieces of the Puzzle

- **Accuracy is important!** It helps the reader quickly find or get to a particular source of information.
- For references, determine the **combination of formatting** from one or more examples on pages 7–11 that are the best fit. For example, you might need to combine “two authors edition stated” example (A2) with “book with 3 to 7 authors” (A3). **Work left to right through the sample reference(s)** to reproduce formatting details.
- Retrieval dates for website information are only required if material may be revised. For example, a website that is periodically updated would require a retrieval date whereas a PDF document or newspaper article would not. [APA p. 192]
