Dr. Priscilla Wamucii RESEARCH COMPLIANCE OFFICER	<i>Priscilla Wamucii</i>	2022.11.04

## 1.0 PURPOSE

The purpose of this standard operating procedure (SOP) is to describe research activities that require Research Ethics Board (REB) review, those that are exempt from review, and activities that are not defined as research requiring review.

## 2.0 SCOPE

This SOP pertains to the Human Research Ethics Board (HREB), Mount Royal University.

## 3.0 RESPONSIBILITIES

Researchers, REB members and REB Office Personnel are responsible for ensuring that the requirements of this SOP are met.

## 4.0 DEFINITIONS

See Glossary of Terms

## **5.0 PROCEDURE**

All research involving human participants must be reviewed and approved by HREB prior to commencement of activities. No recruitment of or interaction with human participants in research may begin until HREB has reviewed and approved the ethics application and respective documents.

### **5.1 Research that Requires REB Review**

5.1.1 The following requires ethics review and approval by HREB before the research commences:

- (a) Research involving living human participants,
- (b) Research involving human biological materials, as well as human embryos, fetuses, fetal tissue, reproductive materials and stem cells. This applies to materials derived from living and deceased individuals.

### **5.2 Research Exempt from REB Review**

5.2.1 Research that relies exclusively on publicly available information does not require REB review when:

- (a) The information is legally accessible to the public and appropriately protected by law,
- (b) The information is publicly accessible and there is no reasonable expectation of privacy;

5.2.2 REB review is not required for research involving the observation of people in public places where:

- (a) It does not involve any intervention staged by the Researcher, or direct interaction with the individuals or groups,
- (b) Individuals or groups targeted for observation have no reasonable expectation of privacy, and
- (c) Any dissemination of research results does not allow identification of specific individuals;

5.2.3 REB review is not required for research that relies exclusively on secondary use of anonymous information, or anonymous human biological materials, so long as the process of data linkage or recording or dissemination of results does not generate identifiable information;

5.2.4 The opinion of HREB should be sought whenever there is any doubt about the applicability of the guidelines and regulations.

### **5.3 Activities Not Requiring REB Review**

5.3.1 Activities outside the scope of research requiring REB review may still raise ethical issues that would benefit from careful consideration by an individual or a body capable of providing some independent guidance, other than HREB;

5.3.2 Quality assurance and quality improvement studies, program evaluation activities, performance reviews, or testing within normal educational requirements when used exclusively for assessment, management or improvement purposes, do not constitute research for the purposes of this SOP, and do not fall within the scope of REB review;

5.3.3 Creative practice activities, in and of themselves, do not require REB review. However, research that employs creative practice to obtain responses from participants that will be analyzed to answer a research question is subject to REB review.
