

The information provided in the iNOI will allow ORSCE to identify resources and services required to provide institutional review and approval of the application.

Partner Organization Forms must be completed by the partner organization and submitted with the iNOI. Partner Organizations that are not included in the iNOI may not be included in the application.

iNOIs must be submitted with a Research Activity Form by the internal deadline indicated in the [MRU Complex Grant Opportunities](#) guidelines. Additional information may be required to complete our review.

Proposal overview	2 page max
Briefly outline the research and/or related activities to be undertaken by the partnership. • What is the challenge or purpose of the partnership, and why is a partnership approach the most appropriate means of advancing knowledge in this area? • What are the anticipated outcomes, and are there any key knowledge translation elements which will facilitate the benefits of the partnership reaching Canadians and beyond? • Provide information re: key partners: how many partner organizations planned; is the partnership local, regional or national; will the partnership include only academic or also non-academic partners, etc. • Describe how this project will support MRU Research and Scholarship Plan strategic goals tied to advancing knowledge, informing teaching and undergraduate research opportunities and community engagement. • Provide in a separate document a detailed budget that clearly outlines the funding commitments of partner organizations and the expectation of in-kind support from MRU. The budget should include the breakdown of funds that will need to be transferred to eligible organizations.
