

# Balance

## Kelaena Maude

This creative work depicts the weight that linear, colonial thought and action has had on the world, which is now in a space of imbalance. That which has been lost, has often been lost with violence and a manipulation of the heart. The heart, incased in ice, has the opportunity to begin melting and beginning the process of rebalancing. With every drop representing the melting of one heart, the scale begins to rebalance. We must recognize that it is a long process and the difference in how the weight of the scale registers feels negligible with each drop. But with many drops, the scale rebalances - not to overtake linear thinking, but to be in balance. We will likely not ever see the scales rebalance in our lifetime, but each heart that melts makes a difference.
